## Samsung s9 plus launch date in india

tech2 News StaffMar 06, 2018 13:22:13 ISTSamsung at an event held in New Delhi, launched its much-awaited Galaxy S9 smartphones. The Korean electronics giant launched two models as a continuation of the Galaxy S series of devices with a standard Galaxy S9 and Galaxy S9+ with prices starting from Rs 57,900. Both smartphones will go on sale in India on 16 March. The Samsung Galaxy S9 and S9 Plus. Image: Samsung Newsroom The Samsung Galaxy S9 and S9+ were first announced at the Mobile World Congress 2018 (MWC) which took place in Barcelona, Spain, a little over a week ago. Both smartphones have now been launched in India and they also arrive with some new storage variants, unlike the past. The standard Samsung Galaxy S9 is priced at Rs 57,900 for the 64 GB model while the 256 GB variant is priced at Rs 65,900. The bigger Samsung Galaxy S9+ packs in more in terms of specifications and is priced even higher at Rs 64,900 for the base 64 GB model and Rs 72,900 for the top-of-the-line 256 GB model. While the price tags may sound a bit too high for an Android smartphone, they are still priced below Apple's iPhone 8 and 8 Plus devices in the Indian market that start from Rs 67,940. The new smartphones from Samsung are also priced a bit higher in comparison to Samsung's own Galaxy S8 launch price which was set at Rs 57,900 last year. The Samsung Galaxy S9 Plus. Image: Evan Blass/Twitter Pricing aside, the new Galaxy S series smartphone do pack plenty of news hardware despite the similar Galaxy S8-like design. The S9 features a 5.8-inch curved Super AMOLED display while the larger S9+ comes with a 6.2-inch curved Super AMOLED unit. Both displays pack in Quad HD+ resolution delivering a pixel-bashing 570 ppi on the smaller S9. Inside, the Samsung Galaxy S9 and S9+ features a brand-new Exynos 9810 SoC clocked at 2.8 GHz which has been manufactured using the 10 nm process that should, in theory, deliver better battery life. Samsung has finally given its customers more reasons to go in for its Plus model this year by including 6 GB RAM instead of 4 GB RAM on the standard S9 model. Both models will be available in 64 GB and 256 GB storage models and also offer expandable storage supporting microSD card of up to 400 GB. The camera is another area where the Galaxy S9 Plus model sees a change. The standard Galaxy S9 model gets a single 12 MP camera module with the new dual aperture feature that allows for better low light photos in low light conditions. The S9+ model gets a dual 12 MP camera setup with dual OIS with one telephoto lens and another wide angle lens. All the details and changes in the Samsung Galaxy S9. Samsung Mobile Press The front-facing camera is an 8 MP f/1.7 aperture that comes with autofocus. Connectivity options include support for gigabit speeds (definitely not in India) with LTE Cat.18, Wi-Fi 802.11 a/b/g/n/ac (2.4/5 GHz), Bluetooth v5.0, NFC, MST and USB Type-C port at the bottom end which is also accompanied by a 3.5 mm headphone jack. Samsung's offers a number of authentications methods like on the Note 8 but now includes a new face unlock feature that combines the standard face unlock with iris scanning, to make it more secure compared other offerings in the Android space. While the design has remained the same, the Samsung Galaxy S9 and S9+ feature a fingerprint reader that is now closer to the centre of the back panel making it easier to access than before. Samsung has also added a stereo speaker setup tuned by audio specialists AKG. Other notable features of the Galaxy S9 also include its ability to capture super slow motion video at 960 fps. Both smartphones pack in Android 8.0 with the Samsung Experience UI 9.0 4.4★ 3,598 ratings &3,597 reviews 5★ 2,462 4★ 632 3★ 201 2★ 81 1★ 222 Displaying 1-10 of 3,597 reviews Sort By: Most Helpful Latest Positive Reviews Negative Reviews Gonzalo Siron (Dec 3, 2018) on Gadgets 360 Battery life is very poor, when fully charged in the morning, it needs to be re-charge at night, Is this review helpful? (0) (3) Reply Info . (Mar 22, 2018) on Gadgets 360 Recommends actually an Iphone Killer! Great quality and performance and excellent UI. Camera is better than Iphone for taking pictures in low light and the 256GB variant with dual Sim capability just kills the Iphone! Is this review helpful? (4) Reply great phone with wonderful features Sarathchandra Repaka (Dec 23, 2018) on Gadgets 360 Recommends I love the Samsung phones for their interface ,even though they may not be as fluid with respect to animations as the stock android the Samsung interface has improved quite a bit. I was a previous owner of galaxy s4, s7 and now s9plus, the most disappointing phone of the 3 was s4 but s9 plus is a beautiful and wonderful phone which has all the features one needs 1.camera (that blows you off) 2.WQHD OLED screen 3.wonderful stereo speakers 4.3.5mm headphone jack 5.flagship processor 6.fast charging 7.great stand by and battery back up for daily use (i am not a smartphone gamer) To conclude my experience finally it is a wonderful allrounder one can buy in this competitive market Is this review helpful? (2) (1) Reply 2years of user review here... LogeshWaran S (Sep 3, 2021) on Gadgets 360 Recommends Build quality and features are amazing... this phone gives lot of positive feels to me with last 2years... i likes particularly on display & design... Dissatisfied on battery performance and bixby button... i got this for32k in flipkart very worthy at this price... actual MRP 70k not worthy if you going to but at this price.... Is this review helpful? Reply heating problem , poor battery life Girish Kumar (Mar 21, 2018) on Gadgets 360 heating problem , poor battery life Is this review helpful? (1) (2) Reply Alok Gupta (May 12, 2018) on Gadgets 360 Is the galaxy s9+ a best option as comparison to i phone... plz advice me fmdz... Is this review helpful? (3) (5) Reply Khoa Tran (Jun 21, 2018) on Gadgets 360 The S9+ battery is not good at all, it can't be score 9 and The camera is not good either if compare with Huawei P20 Pro while they have a same score. I sold S9+ just because of the very weak battery life and camera quality is not good as P20 pro. Is this review helpful? (6) (9) Reply Jahur Arts (Mar 21, 2018) on Gadgets 360 old design and heating problem , nothing special battery life Is this review helpful? (5) Reply Manju G (Dec 31, 2019) on Flipkart Awesome! Brilliant display . Is this review helpful? (3) Reply Amarthyan Amar (May 19, 2020) on Flipkart I brought it for 25k its too good deal Is this review helpful? Reply Share:Samsung Galaxy S9+ arrives to dominate the flagship market with a brand new camera and a long-awaited audio modification. Priced at Rs. 51,880, this model is set to make history in the flagship phone market. Staying true to traditions and yet becoming unconventionally modern, S9+ retains the headphone jack and the microSD slot, offering enough freedom of choices to users. While it may be of a high range, S9+ has brought in enough upgrades to make it worthy of the price, especially compared to the premium-priced iPhone series. Samsung Galaxy S9 Plus tops in style, courtesy to Samsung's signature design of melding two glass panel with a metal frame. However, it does not change much of its design from the previous Samsung S8. It cuts down a few millimeters to shorten the bezels, but even then the phone stays big for small or regular hands. A significant change is the positioning of the fingerprint reader at the back-center of the phone, just like most other Android sets. It is a significant change since the Samsung S8 had the terrible design of keeping the fingerprint scanner adjacent to the camera making users accidentally smudge the lens. Unlike its rivals, Samsung sticks to tradition and comes with a 3.5mm headphone jack and a microSD slot. Like the previous model, it comes equipped with the digital assistant Bixby button. It's in the same position, and there is no option to remap it without third-party software. Samsung S9+ comes with an expansive 6.2-inch display, covering 90% of the front with minimal bezels to deal with. It has the standard 18.5:9 aspect ratio for current all-screen smartphones and the default FullHD 1080p display, but it can also go up to Quad HD+ resolution. The combination produces sharper images and high contrast ratio, and if you pair it with the futuristic curved edges, you get nothing short of a portable theatre experience. The S9+ scored a whopping 630 nits on the light meter, much higher than Pixel 2 XL's 438 nits and 574 nits of iPhone X. So, with a sharper display and better sunlight legibility, Samsung S9+ bests its competition. In India, Samsung has equipped the set with Exynos 9810 SoC, while many other countries got the Snapdragon 845. On paper, both these processors should perform the same. Partnered with 6GB RAM, you can engage in heavy 3D gaming, multiple app downloads, and run various apps - it does not show any lag till now. While iPhone X's A11 is still one of the fastest chipsets, S9+ comes a close second. Tests like exporting a 2-minute 4K video file found Galaxy S9+ taking 2 minutes and 32 seconds, faster than Pixel 2 XL's 2 minutes 55 seconds but remaining significantly behind iPhone X's 42 seconds. Low-light imaging gets a terrific boost with Samsung's all-new flagship, the world's first f/1.5 aperture equipped in a smartphone. It has a unique Dual-Aperture technology. For low-light images, it switches to the f/1.5 aperture so that more light could be collected, and in more light, it moves to the f/2.4 aperture reducing the light intake and keeping the images from getting overexposed. It's a human eye on a smartphone. Samsung S9+ can also take in 28% more light with 30% less visual noise than S8+. The front camera is the same 8MP with autofocus as the Samsung S8+. Selfies are bright but may get oversaturated. Notably, Samsung S8+'s images may have a slightly reddish hue compared to iPhone X's natural hues. S9+ packs the same 3,500 mAh battery as S8+, lasting for a day. Continuous web-surfing sees S9+ lasting an outstanding 10 hours and 59 minutes - a tad bit longer than iPhone X's 10 hours 49 minutes. However, a 90 minutes looped HD video saw a 13% decrease in the battery. Fast Charging helps brings the phone from bone dry to 100% at only one hour 41 minutes. It also comes with wireless charging which is much faster than iPhone X. With a human-eye-like camera and fantastic audio, Samsung has boosted its race to the top lists with S9+. The big-screen display is striking, and the upgrade in the performance will run any heavy game you want. However, Samsung S9+ is a big phone, and it is not handy at all. It also comes with an expensive price tag. If you already have an S8, the upgrades do not look good enough to shell out the big bucks. However, if you own an old phone and want to enter the recent flagship-zone with a fantastic camera, better performance, and killer audio, Samsung Galaxy S9+ is worth considering. Samsung Galaxy F13 Spotted on Geekbench, may feature Exynos 850 SoCRecently, one of Samsung's most awaited phones, the Samsung Galaxy F13 was spotted on a Geekbench listing. This may suggest that the phone is due for a launch soon. The Galaxy F13 is expected to succeed the Samsung Galaxy F12 which came out in April last year. This upcoming Galaxy F-series phone might as well...
